AIM Robotics Monthly Newsletter

December 2023

Photos from our Charity Fundraiser!

Gaga Center Fundraiser!

In the beginning of December, we hosted our **second annual Gaga Center charity fundraiser!** Many friends joined us as we played Gaga and had a lot of fun. We supported the charities **Engineers Without Borders** and **Free Art NYC.** Engineers Without Borders works on providing engineering opportunities to communities around the world, and Free Art NYC empowers youth from underserved communities to participate in the arts. We are proud to have raised over $600 to both organizations. We are so grateful to have made a difference and are already looking forward to our third fundraiser next year!

Monthly Spotlight - Kai

The monthly spotlight of this month is Kai, a leader of our design team. Kai is one of our team's founders, participating in FIRST since 2018. This month, Kai has taken charge with his strong leadership and incredible sketches. He has helped brainstorm new mechanisms and transform ideas from concept to reality. We are so grateful for all of his help on the team! Outside of robotics, Kai enjoys surfing, working out, and cooking Japanese cuisine.
